- Drawers & Cabinets can be positioned along the length of the workbench
- Airflow drilled inwards so no nuts required when bolting

DIMENSIONS

Worktop	Widths	Depths
MFC	900, 1200, 1500 & 1800mm	600, 750, 900mm
Linoleum	900, 1200, 1500 & 1800mm	600, 750, 900mm
Laminate	900, 1200, 1500 & 1800mm	600, 750, 900mm
Beech	1200, 1500 & 1800mm	600, 750, 900mm

CHOOSING A WORKTOP FOR YOUR WORKBENCH

MFC Worktops

- Known as the budget option but still offers great qualities
- Very resistant to oils & moisture – denser than conventional wood
- Grain-like orientation provides the worktop with additional lateral strength
- The MFC (Melamine Faced Chipboard) we provide is 18mm thick, ideal for general purpose applications

Laminate Worktops

- Very easy to clean – simple wipe down required after use
- Laminate material makes the surface very resistant to oil or forms of grease
- Solid 20mm thick worktop more than capable of meeting general day to day use
- Express delivery option of 5 working days on Laminate codes with green icon displayed

Linoleum Worktops

- Smooth working surface which is easy to maintain
- 20mm Lino thickness provides a solid working board
- Please note: If working around Alkalis this product is not recommended
- Durable, preserved appearance due to pigments that run throughout the material

Solid Beech Worktops

- Often preferred for DIY and woodworking applications
- Great 27mm thickness provides a sensible option for heavy duty working requirements
- To keep well maintenance: requires sanding as well as oiling down
- Express delivery option of 5 working days on Beech codes with green icon displayed
